

# Rifugio Pagari

Parco Naturale Alpi Marittime

Attribution : Refuge Pagari (Augusto Rivelli)

*It stands on a small rocky promontory, with a large dry stone wall on the north side to increase the flat space.*

*The construction is dominated to the west by the imposing wall of the Maledia peak. To the N the slope, made up of rocks sometimes covered with grassy vegetation of the nival type, descends to the underlying stream (Rio Pagari), while on the horizon the view extends over the entire Alpine range: from Monviso (N - NW) to Gran Paradiso (N).*
